

Iso-Flo[®] Flash Separation Vibratory Conveyor

Key's [Iso-Flo[®] Flash Separation Vibratory Conveyor](#) is the simple, effective, no-hassle way to remove moils and tails during bottle production. It uses an efficient, proven method of separating large and small items.

A part of Key's [Smart Shaker[®]](#) Family, the Flash Separation Conveyor requires far less maintenance than conventional flash separation methods that use belt or roller conveyors. The easily adjustable "V" trough accommodates various bottle sizes. Minimal downtime and fast changeover help increase productivity and profits.

Quick Changeover

- Easy-adjust slot in bottom of V-pan removes variety of flash sizes
- No time-consuming rollers to adjust
- Casters for mobility

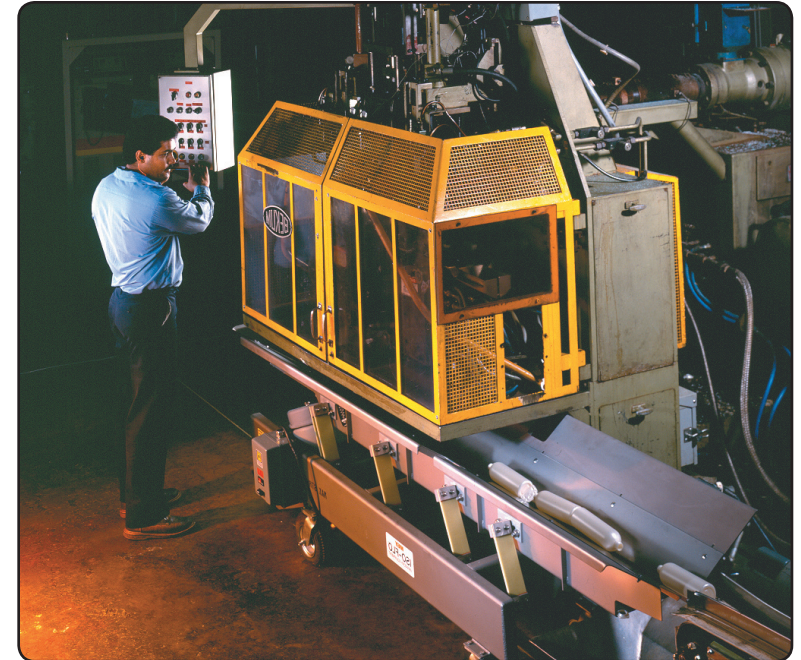

Reduced Downtime and Maintenance

- No conveyor belts or rollers
- Few moving parts
- Nothing to grease
- Oil change every 2 years

Common Product Applications

- Molded plastic bottles

Other applications may be used on this equipment. Call Key to find out about how your product(s) may benefit from this technology or another system.

Less Waste, Lower Costs

- Immediate separation means flash will not stick to bottle
- Close mating with blow molder eliminates waste on floor
- Lower conveying deck recovers flash for recycling

Other Benefits

- Vibration in V-trough only—not the frame
- Custom built for your application
- Energy efficient 1 hp motor
